Contents

Preface **xiii**

1 The way of the program **1**

1.1 What is programming? 1

1.2 What is computer science? 2

1.3 Programming languages 3

1.4 The hello world program 4

1.5 Displaying strings 6

1.6 Escape sequences 7

1.7 Formatting code 8

1.8 Debugging code 9

1.9 Vocabulary 10

1.10 Exercises 12

2 Variables and operators **15**

2.1 Declaring variables 15

2.2 Assignment 16

2.3 State diagrams 17

2.4 Printing variables 18

2.5 Arithmetic operators 19

2.6 Floating-point numbers 21
2.7 Rounding errors 22
2.8 Operators for strings 23
2.9 Composition 24
2.10 Types of errors 25
2.11 Vocabulary 28
2.12 Exercises 30

3 Input and output **33**

3.1 The System class 33
3.2 The Scanner class 34
3.3 Program structure 36
3.4 Inches to centimeters 37
3.5 Literals and constants 38
3.6 Formatting output 38
3.7 Centimeters to inches 40
3.8 Modulus operator 41
3.9 Putting it all together 41
3.10 The Scanner bug 43
3.11 Vocabulary 44
3.12 Exercises 45

4 Void methods **49**

4.1 Math methods 49
4.2 Composition revisited 50
4.3 Adding new methods 51
4.4 Flow of execution 54

4.5 Parameters and arguments 55
4.6 Multiple parameters 56
4.7 Stack diagrams 57
4.8 Reading documentation 59
4.9 Writing documentation 61
4.10 Vocabulary 63
4.11 Exercises 63

5 Conditionals and logic **67**

5.1 Relational operators 67
5.2 Logical operators 68
5.3 Conditional statements 69
5.4 Chaining and nesting 71
5.5 Flag variables 72
5.6 The return statement 72
5.7 Validating input 73
5.8 Recursive methods 74
5.9 Recursive stack diagrams 76
5.10 Binary numbers 77
5.11 Vocabulary 79
5.12 Exercises 80

6 Value methods **85**

6.1 Return values 85
6.2 Writing methods 88
6.3 Method composition 90
6.4 Overloading 92

6.5 Boolean methods 93
6.6 Javadoc tags 94
6.7 More recursion 95
6.8 Leap of faith 97
6.9 One more example 98
6.10 Vocabulary 98
6.11 Exercises 99

7 Loops **105**

7.1 The while statement 105
7.2 Generating tables 107
7.3 Encapsulation and generalization 109
7.4 More generalization 112
7.5 The for statement 114
7.6 The do-while loop 115
7.7 Break and continue 116
7.8 Vocabulary 118
7.9 Exercises 118

8 Arrays **123**

8.1 Creating arrays 123
8.2 Accessing elements 124
8.3 Displaying arrays 125
8.4 Copying arrays 127
8.5 Array length 128
8.6 Array traversal 128
8.7 Random numbers 129

8.8 Traverse and count . . . 131
8.9 Building a histogram . . . 131
8.10 The enhanced for loop . . . 133
8.11 Vocabulary . . . 134
8.12 Exercises . . . 134

9 Strings and things **139**
9.1 Characters . . . 139
9.2 Strings are immutable . . . 141
9.3 String traversal . . . 141
9.4 Substrings . . . 143
9.5 The indexOf method . . . 144
9.6 String comparison . . . 144
9.7 String formatting . . . 145
9.8 Wrapper classes . . . 146
9.9 Command-line arguments . . . 147
9.10 Vocabulary . . . 148
9.11 Exercises . . . 149

10 Objects **155**
10.1 Point objects . . . 155
10.2 Attributes . . . 156
10.3 Objects as parameters . . . 157
10.4 Objects as return types . . . 158
10.5 Mutable objects . . . 159
10.6 Aliasing . . . 160
10.7 The null keyword . . . 161

10.8 Garbage collection 162
10.9 Class diagrams 162
10.10 Java library source 163
10.11 Vocabulary 164
10.12 Exercises 165

11 Classes **171**

11.1 The Time class 172
11.2 Constructors 173
11.3 More constructors 174
11.4 Getters and setters 176
11.5 Displaying objects 178
11.6 The toString method 179
11.7 The equals method 180
11.8 Adding times 181
11.9 Pure methods and modifiers 183
11.10 Vocabulary 184
11.11 Exercises 186

12 Arrays of objects **189**

12.1 Card objects 189
12.2 Card toString 191
12.3 Class variables 193
12.4 The compareTo method 194
12.5 Cards are immutable 195
12.6 Arrays of cards 196
12.7 Sequential search 198
